

Doctoral Research Assistantship at the University of Nebraska at Omaha

The Physical Activity in Health Promotion Lab at the University of Nebraska at Omaha is seeking a doctoral-level research assistant. This funded position will involve a variety of duties related to conducting research studies and assisting in data collection with young children and families. Job duties will include assisting in designing research studies; recruiting participants; collecting and analyzing data collection; and contributing/leading grants and manuscripts. Other duties as assigned. Potential applicants must feel comfortable working with young children (0-2 years) and their caregivers. To learn more about the position, please contact Dr. Danae Dinkel @ dmdinkel@unomaha.edu

Requirements: Graduate degree in Exercise Science, Kinesiology, Physical Activity, Health Promotion, Early Childhood, Developmental Psychology, Public Health or related field; Graduate GPA of 3.2 or higher; Completion of graduate application prior to hiring.

Start date: July 1, 2020 (flexible)
