

Academic Fellowship in Primary Care and Community-Engaged Research in the Division of Epidemiology at the Medical College of Wisconsin

The Division of Epidemiology (DoE) at the Medical College of Wisconsin (MCW) seek an outstanding individual for an intensive faculty development experience that will prepare you as an academic leader in epidemiology, to ensure access to high quality, innovative primary care research, reduce health disparities and promote community wellness.

Our 2-year full-time fellowship will prepare you for a successful faculty career, emphasizing:

- **Epidemiologic Research** on primary care conditions and processes to improve health equity and patient outcomes
- **Educational design, teaching and evaluation**
- **Community-engagement** and partnership
- **Academic leadership**

By collaborating with a rich network of community partners, fellows address social health determinants of health and underlying cultural, linguistic and systems barriers that contribute to primary care sensitive conditions and health disparities. Our nationally recognized faculty provide educational training to complement research experience. Fellows benefit from collaborations with other primary care physicians, clinicians, pharmacists, epidemiologists and social scientists with expertise in epidemiology, mixed methods, geospatial analysis, community engagement, pediatric research, substance misuse and chronic disease self-management. Teaching experiences, research training and mentorship teams are individualized to meet unique needs and interests of each fellow.

Fellows hold a faculty appointment at the rank of Instructor, and receive:

- A competitive stipend and benefits
- Masters degree tuition (if needed)
- Project and travel funds
- Support of a network of productive faculty and peers.

The Academic Fellowship is funded through an Institutional National Research Service Award from the Health Resources and Services Administration and hosting departments. The Medical College of Wisconsin is part of a major Academic Medical Center that includes Froedtert Hospital and Children's Hospital of Wisconsin, with strong affiliations with the Zablocki VA Medical Center and four community-based hospitals that sponsor our family medicine residencies.

Candidate Qualifications

Minimum requirements include a PhD in a relevant field (public health, epidemiology, nursing, social science, biostatistics); AND a commitment to a career in primary care research. Fellows must be U.S. citizens or permanent residents. Spanish speakers and individuals from minority groups underrepresented in academic medicine are strongly encouraged to apply. Applications will be considered until positions are filled.

Please see www.mcw.edu/Family-Medicine/Primary-Care-Research.htm. Contact Carletta Rhodes at crhodes@mcw.edu. Interested applicants should send a cover letter describing qualifications and curriculum vitae to crhodes@mcw.edu. Applicants must also apply on the MCW Job Site at: <https://tinyurl.com/epi-instructor>. The requisition ID is Job # 27182. MCW is committed to increasing the diversity of its faculty and strongly encourages applications from individuals in groups that are underrepresented in the biomedical sciences.

Medical College of Wisconsin | mcw.edu

The Medical College of Wisconsin (MCW) has approximately 1,600 full-time and part-time faculty. MCW has a long and illustrious history in biostatistical and translational research. Data science and clinical trial design are key strategic priorities at MCW. The Medical College offers medical, master's, doctorates, master of public health and master of art degrees. The Medical College works with national and international medical specialty societies and community hospitals to accredit approximately 200 continuing medical education activities annually for physicians and other health professionals.

Milwaukee | milwaukee.org

Located on the west side of Lake Michigan in Wisconsin, Milwaukee boasts some of the nation's largest summer festivals, a multi-cultural population rich in culinary and artistic tradition, a progressive downtown and a multitude of outdoors recreation possibilities, offering a superb quality of life. Milwaukee has affordable housing of all types, excellent public and parochial schools and minimal traffic. Neighborhoods are known for variety and character.
