

PubMed Search Tip: Clinical Queries

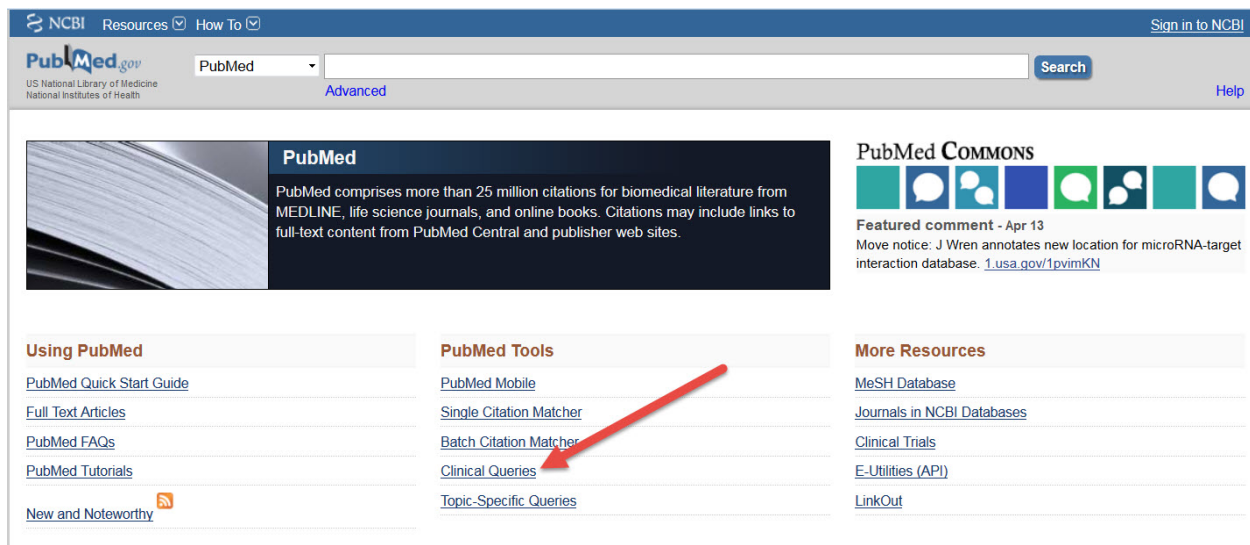

MEDLINE via PubMed has advanced features to help users to get more specific results. One of these features, Clinical Queries, can be found under PubMed Tools on the PubMed Page.

Clinical Queries helps users look for the filters by specific clinical research areas: Clinical Study Categories, Systematic Reviews or Medical Genetics.

As always, access MEDLINE via PubMed through the Library's website. The database can be found on the Literature Databases page. Once you go to the MEDLINE via PubMed home page, select Advanced.

Under PubMed Tools, select Clinical Queries.

Type in your search terms, for example, breast cancer, and then select search.

Results of searches on this page are limited to specific clinical research areas. For comprehensive searches, use [PubMed](#) directly.

Clinical Study Categories

This column displays citations filtered to a specific clinical study category and scope. These search filters were developed by [Haynes RB et al.](#) See more [filter information](#).

Systematic Reviews

This column displays citations for systematic reviews, meta-analyses, reviews of clinical trials, evidence-based medicine, consensus development conferences, and guidelines. See [filter information](#) or additional [related sources](#).

Medical Genetics

This column displays citations pertaining to topics in medical genetics. See more [filter information](#).

The results show the first five (5) in each category.
